DATE MAILED: 07/19/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/812,550	Applicant(s) SUZUKI ET AL.	
	Examiner Shawki S Ismail	Art Unit 2155	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on March 21, 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 1-13 are presented for examination.

The reference in IDS, dated 02/09/2001 has been considered.

Claim Rejections - 35 USC §102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1-13 are rejected under 35 U.S.C. 102(b) as being anticipated by **Karpf**, U.S. Patent No. **5,915,240**.

4. As to claim 1, Karpf teaches an information processing system comprising:
an information disclosing server for disclosing contents (MedLkup-server, col.2, lines 52-59, the MedLkup-server contains a database for storing of medical information);
and

a portal server for obtaining information regarding contents from the information disclosing server and for creating display data provided to a client (MedLkup-client, col.2, lines 52-59, the MedLkup-client obtains updates of medical information from the MedLkup-server),

wherein the information disclosing server comprising:

contents storing means for storing the contents (col.2, lines 52-53, the MedLkup-server contains a database for storing of medical information); and

additional information storing means for storing additional information indicating the respective attributes of contents to be disclosed of contents stored in the contents storing means and relations among the contents to be disclosed (col. 11, lines 23-34, the MedType 1510 contains descriptive information about the type of medical information), further wherein the portal server comprising:

additional information obtaining means for obtaining additional information stored in the additional information storing means in the information disclosing server (col. 11, lines 23-34, the MedType 1510 contains descriptive information about the type of medical information which the MedLkup-client can obtain information on),

additional information storage means for storing additional information obtained by the additional information obtaining means (col. 2, lines 53-54, the MedLkup-client contains a local database with which to store information obtained from the MedLkup-server);

display data creating means for obtaining, in the case of a request having been made from the client, the appropriate additional information from the additional information storage means and for creating display data (col. 7, lines 39-50, an example of how a user request certain content and the display screen that is generated); and

sending means for sending display data created by the display data creating means to the client which made a request (col. 7, line 51 – col. 8, line 24, screen showing means after the user request content to be displayed.)

Art Unit: 2155

5. As to claim 2, Karpf teaches the information processing system according to claim 1, wherein the additional information storage means stores the additional information by creating folders having a hierarchical structure which corresponds to the logical structure of the contents and by storing the respective attributes of the contents in each of the folders (col. 11, lines 5-13, the information is stored in a database and organized according to a hierarchical structure with attributes.)

6. As to claim 3, Karpf teaches the information processing system according to claim 2, wherein information for designating a template used to create the display data is associated with the folders, further wherein the display data creating means creates display data according to an appropriate template (col. 11, lines 34-49, the information is stored according to a specific format.)

7. As to claim 4, Karpf teaches the information processing system according to claim 3, wherein the template creates display data according to an argument provided by a client or according to an argument stored in the additional information storage means (col.7, lines 39-50, the database is categorized by different MedType which the user is able to select from and access.)

8. As to claim 5, Karpf teaches the information processing system according to claim 4, wherein the additional information storage means contains a shortcut by which other folders or contents can be referred to from a predetermined folder (col.13, lines 35-40, the information is stored in a table format which gives the user access to the information without having to go to other files to view the different categories by which the information is classified.)

Art Unit: 2155

9. As to claim 6, Karpf teaches the information processing system according to claim 5, further comprising editing means for editing additional information stored in the additional information storage means (col. 21, lines 24-51, the user can make changes or updates to the medical dictionary database with up to date and current information.)

10. As to claim 7, Karpf teaches the information processing system according to claim 6, further comprising user additional information storage means for storing additional information according to users, wherein the editing means also edits additional information stored in the user additional information storage means, further wherein the display data creating means also creates display data from additional information stored in the user additional information storage means (col.21, lines 247-51, the client updates and edits the local database with current and up to date information.)

11. As to claim 8, Karpf teaches the information processing system according to claim 1, wherein the additional information obtaining means obtains additional information from the information disclosing server by a method designated in advance (col. 6, lines 47-65, the information that is stored in the MedLkup-server will be accessed by the user through a predetermined computer network.)

12. As to claim 9, Karpf teaches the information processing system according to claim 1, further comprising additional information creating means for creating additional information from contents stored in the contents storing means (col.21, lines 447-51, the client updates and edits the local database with current and up to date information.)

13. As to claim 10, Karpf teaches an information disclosing server for disclosing contents, the server comprising:

Art Unit: 2155

contents storing means for storing the contents (col.2, lines 52-53, the MedLkup-server contains a database for storing of medical information); and

additional information storing means for storing additional information indicating the respective attributes of contents to be disclosed of contents stored in the contents storing means and relations among the contents to be disclosed (col.2, lines 52-53, the MedLkup-server contains a database for storing of medical information.)

14. As to claim 11, Karpf teaches a computer-readable record medium recording a computer program executed on an information disclosing server for disclosing contents, the program comprising the functions of:

contents storing means for storing the contents (col.2, lines 52-53, the MedLkup-server contains a database for storing of medical information); and

additional information storing means for storing additional information indicating the respective attributes of contents to be disclosed of contents stored in the contents storing means and relations among the contents to be disclosed (col.2, lines 52-53, the MedLkup-server contains a database for storing of medical information.)

15. As to claim 12, Karpf teaches a portal server for obtaining information regarding contents from an information disclosing server for disclosing contents and for creating display data provided to a client, the portal server comprising:

additional information obtaining means for obtaining additional information stored in the additional information storing means in the information disclosing server (col. 11, lines 23-34, the MedType 1510 contains descriptive information about the type of medical information which the MedLkup-client can obtain information on),

Art Unit: 2155

additional information storage means for storing additional information obtained by the additional information obtaining means (col. 2, lines 53-54, the MedLkup-client contains a local database with which to store information obtained from the MedLkup-server);

display data creating means for obtaining, in the case of a request having been made from the client, the appropriate additional information from the additional information storage means and for creating display data (col. 7, lines 39-50, an example of how a user request certain content and the display screen that is generated); and

sending means for sending display data created by the display data creating means to the client which made a request (col. 7, line 51 – col. 8, line 24, screen showing means after the user request content to be displayed.)

16. As to claim 13, Karpf teaches a computer-readable record medium recording a computer program executed on a portal server for obtaining information regarding contents from an information disclosing server for disclosing contents to a client and for creating display data provided to each client, the program comprising the functions of:

additional information obtaining means for obtaining additional information stored in the additional information storing means in the information disclosing server (col. 11, lines 23-34, the MedType 1510 contains descriptive information about the type of medical information which the MedLkup-client can obtain information on),

additional information storage means for storing additional information obtained by the additional information obtaining means (col. 2, lines 53-54, the MedLkup-client contains a local database with which to store information obtained from the MedLkup-server);

Art Unit: 2155

display data creating means for obtaining, in the case of a request having been made from the client, the appropriate additional information from the additional information storage means and for creating display data (col. 7, lines 39-50, an example of how a user request certain content and the display screen that is generated); and

sending means for sending display data created by the display data creating means to the client which made a request (col. 7, line 51 – col. 8, line 24, screen showing means after the user request content to be displayed.)

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shawki S Ismail whose telephone number is 703-605-4362. The examiner can normally be reached on M-F 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hosain Alam can be reached on 703-306-6662. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
